EXPERIENCE

Front End Developer - Skaas Technology

Bangalore | Feb 2019 - Present

- I have been part of many projects e.g. Recruitment MS, Cloud Labs Portal, Trainer MS, etc. My responsibilities included the front end architecture, UI development, API integration, and front end deployment.

Front End Developer - Torit Innovation

Bangalore | June 2018 - Feb 2019

- Developed UI for client projects using HTML, CSS.
- Modified theme from given UI designs.
- Made PWA compatible WordPress website.

PROJECTS

Text Recognition in React Native Expo Apps

November 2019

- I have built this app using [AWS rekognition SDK](#) on top of React Native.
- Idea was to build a proof of concept that can be similar like [google lens](#) using expo because there are less machine learning SDK/APIs available in React Native Expo build tool.
- I am planning to open source it as a library using cloud ML SDK providers e.g. AWS, Azure and Google Cloud.
- This project was under consideration of conference talk in [Expo AppJS conf - Poland 2020](#).

Ngx-Light-Pagination

October 2019

- This is a light weight [pagination library](#) built for angular 2+ versions.
- The idea was to build a pagination library which can be quickly integrated for internal office projects and later [open sourced](#) it.
- Less than 15 kb and it has been published in [npm repository](#).
- In the first week it was downloaded more than 177 times.

ACADEMIC HISTORY

Tripura Institute of Technology - Agartala

BE Electrical Engg. | July 2017

- GPA 7.44/10

PERSONAL SUMMARY

Experience in front end development, project management and technical writing/blogs.
